May 4, 1964

Mr. Arthur C. Lundahl
Past President, ASP

STAT

Dear Mr. Lundahl:

Those of us that are now concerned with the government of our Society are convinced that many of the problems we face have been faced before; many of the decisions we are making have been arrived at before; many matters of policy have deliberated and resolved in previous years. In short, no policy history or record of important decisions exists on which we may conveniently draw.

Accordingly, we would like to ask your assistance in developing a history of our Society that may be conveniently utilized by succeeding Presidents. To accomplish this, we ask that you review the Minutes of all meetings held during your administration and summarize and categorize important actions, policies, decisions and viewpoints. Our Library, History and Records Committee will then undertake to appropriately develop the resulting documents into a cross-referenced chronology of Society governmental actions.

In anticipation of your willingness to undertake this important assignment and in recognition of the fact that you, more than anyone else, can accomplish it expeditiously and with completeness, I am attaching copies of the Minutes of the meetings held during your tenure as President.

With sincere appreciation for your past and present service to our Society, I am

Very truly yours,

William A. Fischer
President
